

# New South Side Fascia installed this spring

We had to complete emergency repairs on the south side of the church this spring, using hardiboard panels as old fascia was rotten and the eaves troughs collapsed.

This is fine for the back of the church but is not what we envision for the remaining fascia repairs.

The wooden cross on top of the church is rotting and we need to replace it soon.

The fascia in this area can most likely be scraped and repainted.

Many of the cedar boards in this area will need to be replaced. We understand that this size of board is no longer available and may need to be made especially for us. We will be required to source this.

Scraping and repainting only required for this area.

## East Side Fascia

Some cedar boards under and around gutters will require replacing.

## East Side Fascia

Leaking gutters have caused this area to rot and boards need to be replaced.

## North Side Fascia

Minor repairs, scraping and painting required for this side.

## North Side Fascia

In addition to fascia repairs, the entire concrete and brick siding will need to be pressure washed.

## West Side Fascia

Most of the fascia on this side can be saved. Most of the damage is caused by the sun and the paint has blistered. Scraping and repainting should restore the fascia.

## West Side Fascia

Depending on how much of the fascia needs to be replaced, the total cost of repairs and painting may run between \$20,000 and \$30,000. It is hoped that our Pilgrimage of faith campaign this year will deliver our required funds to complete this project.

Our campaign currently sits at \$6,349 below our Diocesan goal. We must achieve that goal (\$41,400) before we can start to work on our parish goal (\$20,000). 101 families have contributed to the Pilgrimage of Faith campaign so far this year of the 920 families registered. This is OUR PARISH, we all have a financial obligation for its upkeep and maintenance. Please consider joining those families with a donation as well.

We can restore our church with required repairs and a yearly maintenance plan thereafter.

We will source the best contractors with the most reasonable quotes as we will need a contractor for repairs and another for the painting.

We may be able to start, or even complete, these repairs this fall. But only with **YOUR HELP!**

**Please pray for its success!!**
